

Back to School

School's back in session. Are you ready?

Preschool, grade school, high school or college—it doesn't matter. Going back to school is hectic and exposes students to all sorts of new germs. Stay prepared with MDLIVE. Perfect for those times when you're too busy to get an appointment with your primary care doctor. Board Certified doctors are available 24/7/365. **Call us at 1-877-540-2082** or visit us online at **MDLIVE.com/**

We're here to help.

"When I first started college, I didn't have a car with me or a doctor I could trust. When I woke up with a sore throat, I didn't know what to do. I called MDLIVE and video chatted my doctor, described my symptoms, and got an antibiotic sent to the pharmacy on campus. It was a lifesaver." - Doug, 19

"My husband and I both work, so pulling one of our kids out of school to see a doctor is tough. Using MDLIVE has allowed us to avoid that hassle—we can see a doctor at night from our living room." - Jenny, 32
